

# OVERDRAFT SERVICE CONSENT FORM

## WHAT YOU NEED TO KNOW ABOUT OVERDRAFTS AND OVERDRAFT FEES

An overdraft occurs when you do not have enough money in your account to cover a transaction, but we pay it anyway. We can cover your overdrafts in two different ways:

1. We have standard overdraft practices that come with your account.
2. We also offer overdraft protection plans, such as a Personal Line of Credit or savings sweep, which may be less expensive than our standard overdraft practices. To learn more, ask us about these plans.

This notice explains our standard overdraft practices.

### What are the standard overdraft practices that come with my account?

We do authorize and pay overdrafts for the following types of transactions:

- Checks and other transactions made using your checking account number
- Automatic bill payments

We do not authorize and pay overdrafts for the following types of transactions unless you ask us to (see below):

- ATM transactions
- Everyday debit card transactions

We pay overdrafts at our discretion, which means we do not guarantee that we will always authorize and pay any type of transaction. If we do not authorize and pay an overdraft, your transaction will be declined.

### What fees will be charged if Think Mutual Bank pays my overdraft?

Under our standard overdraft practices:

- We will charge you a fee of **\$22** each time we pay an overdraft.
- Also, if your account is overdrawn for **5** or more consecutive business days, we will charge an additional **\$5** per day.
- There is no limit on the total fees we can charge you for overdrawing your account.

### What if I want Think Mutual Bank to authorize and pay overdrafts on my ATM and everyday debit card transactions?

\*If you also want us to authorize and pay overdrafts on ATM and everyday debit card transactions contact us:

- In person, complete the form below
- By Phone 1-800-288-3425
- By email [think@thinkbank.com](mailto:think@thinkbank.com)

\*Please allow two business days for this to become effective.

### What if I change my mind and I want to revoke or discontinue having Think Mutual Bank pay overdrafts on my ATM and everyday debit card transactions?

If you want us to revoke or discontinue authorizing and paying overdrafts on ATM and everyday debit card transactions, you may contact us as listed above. Please allow two business days for this change to become effective.

-----  
Your selection:

- I do **NOT** want Think Mutual Bank to authorize and pay overdrafts on my ATM and everyday debit card transactions.
- I want Think Mutual Bank to authorize and pay overdrafts on my ATM and everyday debit card transactions.

## Avoid Overdraft Fees

An overdraft can occur when you try to spend more money than you have available in your checking account. For example, let's assume you have \$40 in your account. You ask the phone company to electronically deduct \$35 from your checking account to pay the bill. You now have \$5 available. Next, you use your debit card to make a \$10 purchase. You overdraw your account if the bank allows the \$10 purchase to be processed. This could cost you expensive overdraft fees. The amount you are overdrawn plus your bank's fees will be deducted immediately, in full, from your next deposit(s) – including from payroll deposits made by your employer, government benefit deposits, and other direct deposits on which you may depend. These deductions will lower your account balance once again and may increase the risk of more overdrafts and costly fees.

## Opt-In Rule

### ATM and Point of Sale Debit Card Purchases

In 2010, federal regulations took effect that provides certain protections for bank customers when their deposit account(s) are overdrawn. Customers now have a choice whether to opt-in to a bank's overdraft program. By choosing to opt-in, the bank can charge you a fee to process point-of-sale (POS) or ATM transactions that exceed your account balance.

This is called the "opt-in rule" – if you do not opt in, the bank will decline your ATM withdrawals and debit card transactions at POS terminals if you do not enough money in your account to cover the withdrawal or purchase. If you do not opt-in but the bank pays an ATM or POS item when your account is overdrawn, the bank cannot charge you an overdraft fee.

### Checks and Other Transaction Account Payments

For other transactions that would cause you to exceed your balance, such as if you write a check that overdraws your account or for recurring bills automatically deducted from your account, your bank can choose whether to "pay" (cover) the transaction that would cause you to exceed your balance. If the bank decides it will cover the transaction, expect it to charge you an overdraft fee, which may average around \$30. If the bank decides not to cover the transaction, it may charge you a "non-sufficient funds" (NSF) fee and the merchant also may charge you a returned check fee.

## Two Ways to Avoid Costly Overdraft Fees in Automated Overdraft Program

You can protect yourself from costly overdraft fees by:

1. **Watch Your Balance.** Track the money you deposit into and withdraw from your account. You can do this on a paper check register or electronically. Remember to track ATM withdrawals, purchases you make with your debit card, bills that get debited electronically from your account, and checks. It also may be a good idea to keep a cushion of funds in your account to help prevent unintended overdrafts.
2. **Link Your Checking Account to a Savings Account.** If the accounts are linked and you do not have enough money in your checking account to cover a transaction, the bank will transfer funds from your savings account to your checking account to cover the difference. This can save you money over other overdraft programs because most banks will only charge you a small fee, if they charge at all, for transfers. But, this option is useful only if you have enough money in the linked savings account to cover the transaction. Otherwise, ask your bank about other less costly alternatives to over-draft payment programs, such as a linked line of credit or affordable small-dollar loan.

### What should I do if I have a problem?

If you have a concern about your account, contact your financial institution. Explain the problem and how you would like to see the problem resolved. If contacting the bank does not produce desired results, you can contact the bank's federal regulator for assistance.
